

GAJENDRA RAJPUT

NOC Network Engineer | Cisco Enterprise Networking

+91 7420818435 | gajendraript@gmail.com | LinkedIn: Gajendra Rajput

PROFESSIONAL SUMMARY

Results-driven Network Engineer with 4+ years of progressive NOC experience across Tier 1, 2, and 3 operations. Proven expertise in Cisco Catalyst/IOS switching, L2/L3 troubleshooting (VLAN, STP, EtherChannel, OSPF, BGP), Cisco & Aruba WLAN operations, and multi-vendor firewall administration (Palo Alto, Fortinet, Sophos). Experienced in leading incident bridges, P1/P2 resolution, RCA/CAPA, ITIL-based change management, configuration audits, and IOS/firmware upgrade cycles. Adept at mentoring junior engineers and improving NOC operational standards.

CORE COMPETENCIES & TECHNICAL SKILLS

Routing & Switching	VLANs, STP, VTP, EtherChannel, OSPF, EIGRP, BGP, DHCP, NAT, QoS basics
Cisco Platforms	Catalyst (2960S/X, 3K/4K/9K), IOS/NX-OS health checks, vPC awareness, Nexus concepts
WLAN Operations	Cisco & Aruba WiFi Controllers, AP management, WPA2/WPA3, 802.1X, roaming/auth troubleshooting
Firewall / Security	Palo Alto, Fortinet, Sophos, ACL, IPS/IDS, Site-to-Site & Remote-Access VPN, Nessus vulnerability scanning
NOC Operations	24x7 monitoring, incident triage (L1–L3), escalation matrix, RCA/PIR, ITIL change/problem mgmt, SLA compliance
Monitoring & Tools	SolarWinds NMS, Wireshark (packet capture/analysis), Putty, VMware Workstation
Config & Lifecycle	IOS/firmware upgrades, config backup/restore, gold template maintenance, patch window pre/post checks
Storage	Dell PowerVault administration, RAID configuration, server integration
Documentation	Network diagrams, runbooks, SOPs, change records, audit-ready evidence

PROFESSIONAL EXPERIENCE

PHN Technology Pvt Ltd

Dec 2025 – Present *Senior Network Engineer (NOC – Tier 2/3)*

- Act as escalation point for Tier 1; lead L2/L3 incident resolution for routing, switching, VPN, and WLAN issues across enterprise LAN/WAN environments.
- Lead incident bridges for P1/P2 network events; perform deep troubleshooting using Wireshark packet captures, syslog analysis, and telemetry correlation.
- Produce high-quality RCA/PIR documentation; identify systemic root causes and drive CAPA follow-through to prevent recurrence.
- Execute IOS/firmware upgrade cycles for switches, routers, and APs: compatibility checks, sequencing, pre/post validation, and rollback planning.
- Perform configuration audits, gold-template compliance checks, and maintain accurate device inventory and backup repositories.
- Administer Dell PowerVault storage (RAID configurations, server integration) ensuring high availability of critical infrastructure.
- Conduct Nessus vulnerability scans and Wireshark-based security investigations to support operational security posture.
- Guide and mentor junior (Tier 1) engineers on NOC best practices, escalation procedures, and documentation standards.
- Deliver clear technical guidance to non-technical stakeholders, ensuring transparency during incidents and maintenance windows.

Semantic Technologies Pvt Ltd

Mar 2023 – Dec 2025 *Network Administrator (NOC – Tier 2)*

- Managed corporate enterprise networks: VLAN design, DHCP, routing policy, Cisco & Aruba wireless controllers, and multi-vendor firewall security (Palo Alto, Sophos, Fortinet).
- Installed, configured, and troubleshot Cisco Switch Stack (2960S/X), routers, and access points; resolved STP instability, EtherChannel mismatches, and routing inconsistencies.
- Configured and maintained site-to-site and remote-access VPNs; performed firewall ACL reviews and IPS/IDS tuning.
- Executed firmware updates, IOS backup/restore, proactive performance monitoring, and bottleneck resolution to maintain uptime SLAs.
- Performed in-depth Wireshark packet analysis to diagnose latency, packet drops, retransmissions, and routing anomalies.
- Supported VMware virtual networking (vSwitches, NIC teaming, port groups, VLAN tagging) and desktop virtualization environments.
- Created and maintained network diagrams, change documentation, runbooks, and SOPs for all deployments and configurations.
- Conducted Nessus security scans to identify vulnerabilities and recommend remediation actions.

Mannschaft IT Pvt. Ltd.

Feb 2022 – Mar 2023 *Network Support Engineer – L1 (NOC Tier 1)*

- Provided first-line L1/L2 support for routing, switching, VPN, and connectivity incidents as part of a 24x7 NOC team.
- Installed and configured Cisco routers, switches, and access points; handled ticket lifecycle management and escalations per SLA.
- Performed basic triage, scope/impact assessment, and documented incident records with complete handover notes.

CERTIFICATIONS & TRAINING

- **CCNA** (Cisco Certified Network Associate) – Cisco
- Actively pursuing **CCNP Enterprise** track (targeting Enterprise Infrastructure + Assurance)
- Palo Alto Networks firewall administration – hands-on production experience
- Fortinet / Sophos firewall – hands-on production experience

EDUCATION

B.E. Mechanical Engineering

2022

Amravati University

Diploma in Mechanical Engineering

2019

MSBTE Mumbai
